

Globanet Migrate 6.0 - Meeting Tomorrow's Archive Migration Requirements Today

What is Globanet Migrate and How Does it Work?

Globanet Migrate is an application developed by Globanet, experts in archive data migration, to provide seamless data migrations for customers. Globanet Migrate provides chain of custody and migration services at an affordable cost. Globanet has leveraged Globanet Migrate to enable customers seeking to quickly and securely transfer archive data between disparate archive services.

The business drivers for archive migration are varied and include displacing legacy hardware or software, adoption of cloud or SAAS based offerings, or corporate reorganizations. One common theme, however, is the requirement for data to be seamlessly and securely migrated as quickly as possible with no loss of accessibility. Globanet Migrate delivers rapid, secure end to end migrations with first-class data fidelity. It will also convert or retire pointers to legacy archive systems to safeguard users against losing access while transitioning to their new archive solution.

Globanet Migrate 6.0 Features/Benefits

1. Complete migration auditing of each unique item migrated and robust reporting for compliance or chain of custody
2. Unique architecture designed specifically for scalability, performance and positioned to take full advantage of cloud-based hardware
3. PowerShell support to enable migration deployment in minutes
4. Powerful filtering capabilities to provide customers the flexibility to limit migrations to specific subsets of data
5. Self-tuning migration services that increase throughput to take advantage of idle resources and reduce throughput when archive services need the resources back
6. Legacy shortcut conversion to enable seamless end user experience during migration
7. Unique task flow offering complete control over migration, including sending data to multiple targets
8. Connector API and SDK to support customized connector production by third parties

9. Supports multiple environments, including:

- **Microsoft Exchange 2007 and 2010 (including Personal Archives)**
- **Microsoft Office 365**
- **Symantec Enterprise Vault**
- **Symantec Enterprise Vault.cloud**
- **EMC EmailXtender**
- **EMC SourceOne**
- **HP Autonomy ZANTAZ EAS**
- **Hosted archives including Mimecast & Proofpoint**

Technical Requirements

- Windows 2008 or above (Windows 2008 R2 or 2012 recommended, Server Core is not supported)
- Dual Core Single Processor (Dual Processor recommended)
- Minimum 10GB of space for Log Files and temporary working file
- A suitable speed (10Mbit or above) connection to the Migrate Nodes is highly recommended
- Microsoft .Net Framework v4.5
- Microsoft Outlook 2007 or 2010 64bit (Full Installation)
- Internet Information Services (IIS) Version 6.0 or above, with ASP.net v4.0 run-time installed and configured to run with IIS
- Client Browser: Internet Explorer 7 or above, Google Chrome
- Microsoft PowerShell Run-time version 3.0

Support

Globanet's industry-leading support team, available via email at support@globanet.com, offers support for Globanet Migrate during organizations' evaluation and use. The support team is also able to assist organizations with converting their search requirements into specific search criteria or helping resolve queries or problems.

Globanet Migrate is commonly offered with a support and maintenance package, allowing organizations to access expertise with Globanet Migrate when they need it.

Pricing

Globanet Migrate is typically priced on a per-server basis, regardless of the number of archives. For more information, please contact Globanet Sales by emailing sales@globanet.com or calling **888.427.5505**.

About Globanet

*Globanet is a leading provider of archiving and ediscovery solutions worldwide. Founded in 1996, the company is a pioneer in archiving and intelligent information governance, and has developed a portfolio of software and services to help organizations manage data from creation to expiry. Globanet's proprietary solutions include the Merge1 message capture platform and Migrate (formerly GEM) data migration software. A Symantec Platinum Partner with Master Specialization in Archiving and eDiscovery, its professional services team has extensive experience with industry-leading Enterprise Vault and Clearwell. Globanet's broad range of services includes policy and solution design, installation and configuration, data migration, custom add-ons and project-based ediscovery consulting.
