

Case Study: PST Flight Deck

OVERVIEW

Market Sector	Government
Customer Size	4000
Products Used	PST FlightDeck
Services Requested	Discovery and Migration into Office 365 secondary mailbox

PROJECT REQUIREMENTS

- The customer had started to migrate users from an on-premise solution to Office 365
- The customer needed to locate all PST files in their environment
- Shared Network appliances needed to be decommissioned
- Once the PST files had been discovered the customer needed to migrate all PST file content into Office 365
- Legacy Data needed to be migrated into shared archives
- Users were located in several geographic locations.

ADEPT-TEC SOLUTION

- Design, deploy and manage a PST FlightDeck environment
- Set up ingest servers in each location to reduce network traffic
- Email users when they had been enabled for migration and when their migration had completed.
- Set up a Transparent Central Upload server to reduce network traffic
- Enable transparent migration
- Remove source PST files after successful migration
- Retain backups of all PST files
- Migrate legacy data into shared archives

ABOUT ADEPT-TEC

Adept-tec helps companies implement, enhance and transform their archiving solutions, allowing augmented e-discovery and search capabilities. As well as specialising in migrations, best of breed toolsets and optimising your archiving experience we can provide full training on the solutions we support.

We offer a full turn-key solution on commissioned projects or can integrate into an existing team structure to provide specialist advice and skills where required. Our priority is always on advising the customer on the most appropriate and cost-effective solution utilising the best-of-breed tools. We have a well-deserved reputation for providing our customers with the optimal solution for their business needs.
