

Mailbox Shuttle

Migrate users quickly and safely to Exchange and Office 365

Email is a mission-critical service, so it's important that when you decide to migrate your live mail the solution you choose minimizes end user disruption, and uses intelligent automation to maintain compliance and business continuity.

How Mailbox Shuttle works

Mailbox Shuttle is an enterprise-grade solution for migrating live email systems quickly and safely to Exchange 2010, 2013, 2016 and Office 365. The solution provides maximum efficiency with minimum intervention.

Mailbox Shuttle ensures continuous user email access, provides full checks, monitoring and reports, and is readily scalable. Chain of Custody and compliance best practice is followed at all times, and a full audit trail following Microsoft's best practices is maintained at every step of the migration process.

Live email migrations are rarely done in isolation. The sophisticated custom PowerShell scripting engine enables Mailbox Shuttle to act as a central orchestration tool for a much larger migration project. You can use it to update Office 365 licensing, enable new services, call other Quadrotech migration products, or launch other custom scripts to build a workflow for your entire project.

Mailbox Shuttle cloud

Mailbox Shuttle cloud gets you migrating in minutes. Its dedicated control module manages the migration without needing to deploy on-premises hardware. All that is required on-premises is to install a single set of modules.

Sync'n'Switch technology

Mailbox Shuttle's proprietary Sync'n'Switch technology uncouples data synchronization from user migration, guaranteeing that users are not interrupted while their email is migrated.

This enables seamless migration across Active Directory (AD) forests, helps consolidate email across organizational boundaries, and enables email integration following mergers and acquisitions.

Integrated live mailbox and archive migration

Migrating to Office 365? Use Mailbox Shuttle and Archive Shuttle together. Single schedule preserves dependencies between live mail and archive with no user interruption.

Enterprises typically have a connected and dependent infrastructure in which live mailbox systems, public folders, archives, and offline PST files co-exist. Quadrotech is the only migration vendor with a single suite of proven applications for migrating the entire email ecosystem. Mailbox Shuttle can be used as an orchestration tool for the entire integrated migration framework, covering live mail, email archives, PST Files and Public Folders

Mailbox Shuttle process

Key features	
Comprehensive planning	Extensive analysis of information helps plan the migration effectively. Automatically accounts for Exchange or Office 365 restrictions, depending on target.
Optimized for Exchange On-Premises and Office 365	Users can be migrated to Exchange on-premises, Office 365 or a hybrid of the two. Migration can be within the same organization or across Active Directory (AD) forests using Sync'n'Switch.
Transparent to users	No disruption to user productivity.
Flexible and scalable	Optimized to manage multiple thousands of users, with planning and scheduling applications ensuring best use of resources. Assignable white and black periods for migration process. These take into account mailbox migrations completed each day, together with planned migrations, allowing daily tasks to be defined.
Robust security	Full audit trail maintained, and compliance best practice followed throughout. Roles and policies can be defined to control admin access and execution of migration activities.
Robust PowerShell Scripting Engine	Powerful scripting engine allows for custom scripts to run before the migration starts, after the initial sync completes, and after the migration. Use cases include: applying or managing Office 365 licenses, enabling Skype for Business, adding additional SMTP addresses, and much more!

About Quadrotech

Quadrotech specializes in email migration projects of all sizes. In the past two years alone, we have migrated over 11.6 Petabytes of data and almost 4.7 million mailboxes. Our single-vendor approach allows the management and co-ordination of migration across four email content locations. We provide direct export and import connectors for the major on-premises, cloud email, and archive platforms.

Our services don't stop at migration. We are also the market-leading provider of Office 365 reporting, analytics and auditing tools. Offering a suite of over 100 reports covering all major Office 365 services, our reporting solutions help customers gain the business insight to control their Office 365 environment on a global scale.
